EDUCATION

- S.I.W.S. College** Mumbai, India
 - Master of Science in Computer Science; GPA: 8.40* *July 2024 - April 2026*
 - Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases*

SKILLS SUMMARY

- Languages:** C#, JavaScript, SQL, HTML5, CSS3
- Frameworks:** ASP.NET Core, Web API, Entity Framework, ADO.NET, LINQ, ReactJS, Bootstrap, Tailwind CSS
- Tools:** Visual Studio 2022, Visual Studio Code, Git, TortoiseSVN, SonarQube
- Platforms:** Azure, Apache Spark, PySpark
- Soft Skills:** Agile/Scrum, SDLC, Unit Testing, Distributed Data Processing

EXPERIENCE

- Maximus Infoware (India) Pvt. Ltd.** Onsite
 - Software Engineer (Full-time)* *Jun 2024 - Present*
 - Automated Reconciliation Workflow:** Designed a fully automated reconciliation workflow requiring one-time client configuration with zero ongoing manual intervention.
 - Banking Client Onboarding:** Led onboarding of 30+ banking clients onto a single configurable web application, eliminating redundant client-specific codebases.
 - SQL Server Optimization:** Optimized SQL Server 2019 queries and stored procedures, improving reconciliation performance and data integrity at scale.

PROJECTS

- Trace - Multi-Bank Reconciliation Platform:**
 - Developed and supported a production-grade reconciliation platform implemented across **30+ banks** for automated transaction reconciliation.
 - Implemented reconciliation workflows across multiple banking sources including **Network, GL, Switch, and ATM EJ** data.
 - Automated client-specific configurations and reconciliation processes to reduce manual intervention and improve operational efficiency.
 - Optimized **SQL Server queries and stored procedures** for processing large-scale transaction data.
 - Tech: **C#, ASP.NET Core, ReactJS, SQL Server, REST APIs, Python, PySpark**
- PySpark Trace:**
 - Developed an R&D-based distributed reconciliation solution using **Python and PySpark** for large-scale transaction processing.
 - Designed the solution to perform reconciliation on up to **1 crore (10M) records in approximately 15 minutes**.
 - Explored distributed data processing and optimization techniques to improve reconciliation performance for high-volume datasets.
 - Tech: **Python, PySpark, SQL Server**
- Face Recognition Attendance System:**
 - Developed an automated attendance system using **Python, OpenCV, and Face Recognition** for real-time face detection and identification.
 - Implemented face encoding and matching to identify registered users and automatically record attendance.
 - Built image preprocessing and recognition workflows to improve identification accuracy under varying conditions.
 - Stored and managed attendance records using a structured database for tracking and reporting.

HONORS AND AWARDS

- Received **Performance of the Year Award** for 2025–2026
- Achieved **First Rank** across all three years of B.Sc. Computer Science
- Achieved **Second Rank** in M.Sc. Computer Science

VOLUNTEER EXPERIENCE

- Volunteer at Swastika Cultural Event** Mumbai, India
 - Actively participated in organizing and supporting cultural activities and events at S.I.W.S. College.*
